The Test Manager's Lament

- Started as an individual contributor
- No training
- "The people stuff is hard to do"
 - "the Management stuff isn't easy either"

Successful Test Management: Eight Lessons Learned

Managers Have Two Primary Roles

- Get the best work out of your people
- Create an environment that enables people to work

- Strategy drives how you do this
- What's your mission?

To assess the state of the product under development at any time and report on that state.

Help People Do Their Best Work

- Uninterrupted time to talk to everyone once a week
- Assume the person knows how to do their job
- Treat people the way they want to be treated
 - Not the way you want to be treated

Successful Test Management: Eight Lessons Learned

Create the Working Environment

- Emphasize results, not time
- Admit your mistakes
- Commit to projects after asking your staff
- Plan training time every week
- Planning the testing

5

Uninterrupted Weekly Time With Each Person

- You need to know what your organization or project is doing
- You need to know what the people are doing, so you can create performance reviews

6

Successful Test Management: Eight Lessons Learned

One-on-Ones

- With everyone, at a regular uninterrupted time
- We talk about
 - Their accomplishments
 - Their issues
 - If they need my help
 - Anything else they need to discuss

7

But, I Don't Have Time to Meet With Everyone...

- You already are
- If you plan time, you can reduce the number of unplanned interruptions
- How will you give timely feedback on performance?

8

Successful Test Management: Eight Lessons Learned

Assume the Person Knows How to Do Their Job

- You *used* to know how to do the job
 - Do you really still know how?
- You hired the people because you thought they could do the work. Let them...
 - Give them assignments
 - Ask if they need help
 - Don't interfere
 - Sneak up behind them and ask "How's it going?"
 - Micromanagement
 - Inflicting advice
- Choose a metric to know when you are stuck

jr@jrothman.com

9

Successful (and Helpful) Managers

- Assign the work
 - Do they understand the work to do?
 - Do they have the tools required?
- Decide when to check in
- Supply help when requested, and not before

10

Successful Test Management: Eight Lessons Learned

Treat People the Way They Want to Be Treated

- Everyone likes different projects
 - Specific tasks vs. general information
 - New complex problems vs. immediate success
- Everyone is motivated by different things
 - Money is not the only reward
 - Private thank-you's
 - Public recognition
 - M&Ms
 - Movie tickets
 - Team party
 - Ask the group

jr@jrothman.com

11

Emphasize Results, Not Time

- Hours working do not positively correlate with productivity
- Permit (Force?) people to only work 40 hours per week
 - When they work longer, they do non-work things
 - Productivity goes down
 - If you keep people working only 40 hours per week, they work on work things

12

Successful Test Management: Eight Lessons Learned

Managing in a High-Interruption Environment

- “You can’t get anything done here between 9am and 5pm”
- Can you cancel meetings?
- Can you or your staff reorganize the work?
- Observe results and obstacles to results
 - Easier to give accurate performance evaluations

© 2000 Johanna Rothman

www.jrothman.com

jr@jrothman.com

13

Reward Results

- Plan for a 40-hour week, and reward the work done in that time

© 2000 Johanna Rothman

www.jrothman.com

jr@jrothman.com

14

Successful Test Management: Eight Lessons Learned

Admit Your Mistakes

- Mistakes are embarrassing
- If you admit mistakes, people respect you more
- Don't deny or ignore mistakes

© 2000 Johanna Rothman

www.jrothman.com

jr@jrothman.com

15

Commit to Projects After Asking Your Staff

- "Can we have this next month?"
- Even if you've already considered the request, the answer is "No"
 - In the moment, you might confuse this request with another request
 - There may be other implications you haven't considered, since it's no longer the same time you first considered this request.

16

Successful Test Management: Eight Lessons Learned

Don't Train Your Management to Ask You for an Answer

- Your staff will know that you think:
 - I want to know what it will really take you to do this work
 - I'm not afraid to tell my management what it will take

© 2000 Johanna Rothman

jr@jrothman.com

17

Plan Training Time in the Workweek

- Engineering is constantly changing
- People generally like getting training
- Many inexpensive ways
 - Brown bag lunches
 - Periodic talks from other groups
 - Present projects across the company
 - In-house tool "user group" meeting
 - Outside experts
 - Professional consultants or speakers
 - Knowledgeable friend or colleague

© 2000 Johanna Rothman

www.jrothman.com

jr@jrothman.com

18

Successful Test Management: Eight Lessons Learned

Planning the Testing

- Plan what you (your test group) can do
 - If you want to do more, plan how
- Develop test strategies for each product
- Develop release criteria for each project

© 2000 Johanna Rothman

www.jrothman.com

jr@jrothman.com

19

What Your Group Can Do

- What capabilities does your group have?
- What capabilities do you want to have in the group?

© 2000 Johanna Rothman

www.jrothman.com

jr@jrothman.com

20

Successful Test Management: Eight Lessons Learned

Test Strategies

- Not every product is tested the same way
- As the manager, you get to choose how to test

Release Criteria

- Measurable ways to assess product ship decisions
- Assess risk of shipping
 - You aren't a gatekeeper
 - You don't have to stop shipment

Successful Test Management: Eight Lessons Learned

Testers Can Make Great Managers

- Manage your management career the way you plan and develop tests
 - Develop a strategy
 - Identify how to manage your staff
 - Observe your own work
 - Make corrections and continue
- You don't have to be perfect
- Do enough right to help people do their best work in an environment they can work in
